

# AI Call Center

AI-Powered Voice Automation for Modern Enterprises

Automate customer conversations, reduce costs by up to 70%, and scale voice operations with enterprise-grade AI.

# The Business Problem

## High Call Center Costs

Human agents cost ~ \$ 1+ per minute with limited scalability

RISING COSTS

## Limited Scalability

Hiring and training agents is time-consuming and expensive

OVERLOADED AGENTS  
CONFUSION

MANUAL QA  
DASHBOARDS

## Quality Monitoring

Manual QC is labor-intensive and inconsistent

## Multilingual Complexity

Managing Indian languages and dialects is challenging

# Solution Overview

- **AI Voice Agents**

Inbound & outbound calling with human-like conversations

- **Intelligent Routing**

Only valid calls routed to human agents

- **Real-Time Analytics**

Live insights on call sentiment, intent, and outcomes

- **Flexible Deployment**

On-premise, private cloud, or hybrid setup

# Key Value Proposition

Enterprise-grade quality, intelligent filtering, real-time insights

**70%**

**Cost Reduction vs  
Human Agents**

**1000s**

**Concurrent AI Agents**

**20+**

**Global Languages  
Supported**

# Core Capabilities

## AI Voice Agents

Inbound & outbound calling with natural conversations in Indian and English languages

## Call Categorization

Semantic understanding to classify calls by intent, topic, and urgency

## Sentiment & Intent Analysis

Real-time detection of customer emotion and conversation direction

## Demographics Insights

Gender identification and demographic profiling for targeted strategies

## Auto-Summarization

AI-generated call summaries and transcripts for audit and training

## Integrated Dashboards

Real-time KPIs, call history, and performance metrics at a glance

# Advanced AI Intelligence

## **Natural Language Understanding**

Context-aware conversation flows that adapt to customer needs

## **CRM & ERP Integration**

Seamless API integration with Salesforce, Zoho, and custom systems

## **AI Quality Scoring**

Automated QC with granular scoring for agent performance

## **Predictive Insights**

Forecast call outcomes and optimize campaign performance

# Enterprise Deployment Architecture

## Voice Input

Mobile, PSTN, Airtel SIP gateway integration

## Local Processing

On-premise AI models, transcription, storage

## Intelligence Layer

Dashboard, APIs, real-time analytics engine

- **Session Border Controller:** Handles VoIP gateway & routing
- **SIP Servers:** Real-time call management & signaling
- **Processing Servers:** Transcription, AI inference, analysis
- **Storage Layer:** RAID storage for call recordings & data
- **Human Handoff:** Seamless agent escalation when needed
- **Cloud Hybrid:** Optional cloud LLM integration (GCP, Gemini)

# On-Premise & Infrastructure Control

## Your Servers

- Client-owned hardware
- Buy or rent options
- Full data ownership
- Zero external exposure

## Performance

- Low-latency processing
- Real-time call handling
- Seamless system integration
- Enterprise scalability

# Security, Privacy & Compliance

## Data Protection

- Client-controlled storage
- Call recordings on your servers
- Local network communication
- Minimal data exposure

## Compliance-Ready

- Enterprise security standards
- GDPR & data privacy ready
- Audit trail & logging
- Regular security reviews

# Enterprise Support & SLA

## 60 Minutes

### Support Response SLA

24/7 monitoring & rapid issue resolution

- ✓ Dedicated account manager
- ✓ Continuous system monitoring
- ✓ Proactive optimization
- ✓ Enterprise reliability SLA

# Custom Development & Flexibility

- **Post-Deployment Customization**

Tailor conversation flows, agents, and workflows to your exact needs

- **Feature Enhancements**

Add custom fields, integrations, and business logic without downtime

- **API-Based Extensibility**

Billed per man-hour for development, customizable pricing tiers

# Ideal Use Cases

## Enterprises & BPOs

Large-scale operations

## Real Estate

Lead qualification & follow-ups

## Banking & Finance

Customer service & compliance

## Healthcare

Appointment & patient support

## Education

Enrollment & student support

## E-Commerce

Customer service & returns

# Build the Future of Voice Automation

with **ROBUST AI Call Center**

Enterprise-grade intelligence, security, and scalability. Ready to transform  
your customer interactions?

Contact our team to schedule a demo and see AI Call Center in action.
